

Contact points

Regional Contact Points

The Contact Points are important elements for CoNet CZA 21's implementation-orientated approach.

Regional Contact Points

- are mostly on the local level
- are representatives of CoNet CZA 21
- spread the idea of CoNet CZA 21 e.g. within the political administration in their city and municipality but also to the local and regional public.
- offer further information for every interested person, organizations or other actors who want to get in contact with CoNet CZA 21.

Thematic Contact Points

The Thematic Contact Points have more specific tasks.

- They work on a special field of interest within the existing Coastal Network spread their ideas within the network and elaborate steps to implement concrete ideas and projects within their thematic field.
- work within their respective professional background and
- work with their local and regional networks / groups of public participation but within the background of the Baltic Sea Coastal Network.
- offer exchange of information and experiences between the CoNet Contact Points, who again spread these information within their local network.
- offer exchange of local and regional experience by facilitated workshops and discussion round-tables and
- they publish information, experiences and results in the internet, so that other actors can make use of it as well.
- are also contact persons for interested people from "outside" the existing Coastal Network.
